Eccentric. by Rogerseller

Eccentric by Rogerseller

Designed by Rogerseller and manufactured in Australia, Eccentric pays homage to the quirky genius of the greatest minds in history and acts that tell of the individualism.

Thanks to its uniquely positioned off-centre axis, the Eccentric mixer reveals an unexpected back-plate featuring cold and hot indicators. Once the handle is returned to its closed position, the unconventional back-plate is hidden and balance restored.

Using German progressive cartridge technology, the Eccentric mixer enhances user safety and energy saving by opening in a low-pressure, cold position which increases in pressure with the turn of the dial. Unlike a traditional mixer, hot water is introduced only when required by rotating the mixer past the cold mark, increasing in temperature as the dial moves to its furthest open position.

This refined aesthetic is available in our Natural Elements finishes chrome, graphite, matt black, brushed nickel and brushed gold, the sink mixer will complement any contemporary kitchen or laundry.

Arq
by Rogerseller

Arq by Rogerseller

Designed by Rogerseller and manufactured in Australia, the Arq by Rogerseller Sink Mixer is a fusion between soft radius' and clean lines; a simple and understated design with modernism flowing between form and function.

The ideal height for a functional kitchen, the cylindrical figure of the mixer flows seamlessly into a lineal formed lever with softly sculpted edges, a feature which is carried across the complete Arq by Rogerseller collection.

Available in our Natural Elements finishes chrome, graphite, matt black, brushed nickel and brushed gold, the sink mixer will complement any contemporary kitchen or laundry.

A Signature Finish: Natural Elements

Inspired by the colours of the environment around us, Rogerseller's Natural Elements collection of finishes captures the textures and hues of raw, organic materials in an unparalleled celebration of craftsmanship and materiality.

CHROME

Smooth and steely like the reflection of a calm lake, Chrome is an eternally popular finish for its durability, timeless value and unique aesthetic of cold without chill.

GRAPHITE

An exquisite composition of satin nickel and trivalent chrome technology, Graphite brings you a velvety dark grey with a hint of cool blue hues for a hard-wearing, contemporary finish.

MATT BLACK

Resistant to fading and scuffing, Matt Black is bold and memorable – inspired by ancient volcanic rock, some of the earth's oldest naturally occurring materials.

BRUSHED NICKEL

Brushed Nickel draws on the interplay of light and dark, hard and soft in the natural world. A cool, contemporary undertone meets subtle warmth and texture.

BRUSHED GOLD

Brushed Gold captures the natural world's most luxurious texture. Decadent yet lighthearted, this finish showcases the allure of raw materials with a gently contemporary character.
