CVI618NX  
Stainless Steel Trim  
Right Hinge

CVI618NRS  
Copper Trim  
Left Hinge

CVI618NXS  
Stainless Steel Trim  
Left Hinge

## EXTERNAL TEMPERATURE CONTROL

Smeg wine cellars feature a user-friendly touch-control display on the outside of the door glass, which allows access to change temperature, humidity and light without opening the door. This prevents changes in the internal temperature, reduces vibration and exposure to UV rays.

## 18 BOTTLE CAPACITY

Storage of up to 18 Bordeaux (750ml) bottles. Perfectly shaped housings provide ample storage for different shaped bottles. Champagne and magnums can be stored horizontally without risk of sliding.

## PREMIUM OAK SHELVES

Telescopic sliding oak shelves allow for easy placement, storage and removal. The smooth movement prevents disturbance of wine sediment. Made in Italy, these racks are crafted from the same oak as traditional wine barrels.

## UV RESISTANT GLASS

Thanks to Smeg's Eclipse black-glass technology, wine is perfectly shielded. The layered glass protects wine from damaging light and gives maximum transparency. Solar light and UV rays can alter a wine's structure, ruining its balance and flattening its scent.

## VIBRATION PROTECTION

Smeg wine cellars are equipped with an ultra-quiet cooling system which keeps vibrations down to a minimum. Even the smallest vibrations can affect wine by lifting sediments. This causes different components to mix, altering the balance developed during the ageing period.
