BENEFITS

Understanding new capacity and energy ratings
From the 15th August 2021, the way refrigerators are tested to
calculate Energy Star Ratings and energy consumption have
changed. This means that the capacity and energy rating
calculations have changed, however the product remains
unchanged. Be sure to check all new ratings to ensure that
your comparisons are consistent with the new standards.

Dimensions

Minimum Recommended Airspaces

Before you move your appliance into the place where it will operate, check that it will have adequate clearance. Clearance is required for air circulation and too little clearance may affect the performance of your appliance.

We recommend minimum clearances of:

- 30mm on each side.
- 30mm above the refrigerator.
- 50mm minimum/75mm maximum behind the refrigerator.

Please note: Doors are designed to sit proud of cabinetry (not flush). The clearances shown above are the recommended minimum clearances. The clearance at the rear must not exceed 75mm.
