| Warranty             | Two years parts and labour  |

#### THERMOSEAL

The seal of Smeg's quality, technical excellence and taste: succulent roasts, crisp pastry and impressive baking is achieved in Smeg's unique, perfectly controlled cooking environment. ThermoSeal maintains the perfect atmospheric balance in the cavity for optimum cooking conditions.

#### PYROLYTIC CLEANING

Smeg's pyrolytic cycle locks the door and heats the oven to around 500°C. This process carbonises any food residue or burnt-on grease to a small amount of ash, which can be simply wiped away with a damp cloth. Smeg also has Eco Pyro - the low energy option.

#### EVER CLEAN ENAMEL

The superior quality of Smeg's patented Ever Clean enamel, which is highly durable and easy to clean, is the result of nearly 70 years of enameling expertise; ensuring long-life performance of every Smeg oven.

#### COOL DOOR TECHNOLOGY

Smeg's Cool Door system is a combination of technologies which is driven by a 22 blade tangential fan and includes a heat exchange baffle system. It draws cool air up through the panes of heat-reflective glass in the door, making it safe to the touch even when the oven is at pyrolytic temperatures of around 500°C.

#### SMARTSENSE

Smeg's SmartSense intuitive program selection is easy-to-read in the large LCD panel. Effortlessly select oven functions, temperature and time for cooking; enter the time you want your meal to be ready and your delay start is calculated for you; or cook 20 pre-programmed favourites at the flick of a button.

#### SOFT CLOSE DOOR

The new soft-close mechanism on Smeg's oven doors ensures a two-stage soft and quiet close. Smeg's quality hinges also ensure the door will not drop on opening, an intrinsic safety feature.
