LINEARCooling™

The LG Inverter Linear Compressor delivers more precise temperature control to help reduce internal temperature fluctuations¹.

DoorCooling+™

The side air vent directs air flow in the door area to help cool the front of the fridge and the door basket area. Items stored in the door area can cool up to 35% faster than in comparable LG fridges without Door Cooling+™²

Inverter Linear Compressor

With less vibration, moving parts and noise than a conventional LG compressor system, the LG Inverter Linear Compressor is quieter and more durable.

LG 10 Year Parts Warranty - as the Inverter Linear Compressor is the heart of your refrigerator we back this with a 10 year parts warranty on the compressor.

Smart Diagnosis™

Smart Diagnosis™ the refrigerator can "talk for itself" using either the Smart ThinQ™ Smartphone app³ or by calling the LG Customer Information Center to find a solution that may save time and money on unnecessary callouts.

¹ Based on testing comparing mean temperature fluctuation between comparable LG top mount refrigerators with Inverter Linear Compressor and without Inverter Linear Compressor.

² Based on testing comparing time taken to cool liquid from 32°C to 5°C in LG Inverter Linear Compressor refrigerators with Door Cooling and without Door Cooling.

³ Compatible iPhone or Android Smartphone required - Android 4.1.2 (JellyBean) or later version/iOS 8 or later version.
