

Eon Single Heated Towel Rail
770mm
3435005701 — Polished Stainless Steel

Other finishes available

Please note

- This product operates with 24V. The supplied transformer must be installed by a licensed electrician during rough-in, in a position within 2 meters of the closest heated rail.
- During fit-off connect the pre-installed electrical wires to the rail adapter, then securely fix the wall adapters to the finished wall using the supplied fixings and template.
- Attach rail to the wall fixings using the clip-on adapters.
- Switch on the mains supply and allow 30-60 minutes for rail to reach maximum temperature.
- This is only an installation guide. Rogerseller recommends having the product on-site before commencing rough in.
- Full installation instructions come with the product or at request.
- Rogerseller recommends this product is fixed to secure studs.
