

AEG

LWX9A9613C

The 9kg washer 5kg dryer, ÖKOKombi with SensiDry heat pump condenser technology, weight sensor, Woolmark Blue accredited (Wash&Dry), Plus Steam and 1600rpm spin speed.

Product Details

FEATURES

OKOPower

The OKOPower program will Wash & Dry 3kg of laundry in only 3 hours

Wash and dry in one go

Woolmark Blue

Approved by The Woolmark Company for washing even your handwash only woollens.

Advanced weight sensor

Steam Refresh

Quickly refresh your garments without the need for washing

Aqua Control System

Automatically shuts off the water inlet if a leak is detected in the hose.

OKOInverter Motor

Similar to professional machines, the OKOInverter brushless inverter motor is quieter and can extend the working life of the motor whilst using less energy.

BENEFITS

Dual technology for sensitive care

Dualsense technology offers different programs to different types of fabrics. Lower heat and controlled movement mean that everything from delicates to outdoor wear can be carefully washed and dried in one go. Both washing and drying cycles are certified by Woolmark Blue to safely clean even hand-wash only woollens in one process. For outdoor wear, a dedicated wash cycle cleans and protects technical fabrics to preserve their textures over time; and a dedicated dry cycle works to restore water repellency.

Perfect drying, best in class in efficiency

With our heat pump technology, the OKOKombi washer dryer is rated 7 energy stars for drying and reduces running costs without compromising results. To minimise water usage, the warm air condenser requires just a litre of water to begin the drying process, yet consumes no water during the drying phase.

Safe, low temperatures

SensiDry heat pump technology dries with low temperatures and uses precise sensors to monitor the drying cycle. This ensures that fabrics are never subject to unnecessary heat meaning your clothes will keep the textures they had for longer.

Every fibre cleaned and protected

Advanced OKOMix technology blends detergents and then softeners with water before they enter the drum. This ensures that every fibre is cleaned and cared for with the right mix of detergent, even for shorter cycles. Every thread, every stitch, every fibre, expertly protected.

Caring for clothes, saving water and energy

ProSense technology intelligent sensors optimises and displays the estimated wash time within 30 seconds of starting the wash cycle. Whether it is a few shirts or your entire weekly laundry, the wash time, water and energy consumption adjust to ensure they are only washed for the exact amount of time required. This ensures that fabrics suffer less wear and tear, maintaining colour and texture.

Keeps your clothes looking and feeling impeccable

The steam refresh program enables you to refresh your garments without washing with detergent and water. This ensures less wear and tear on fibres so they can maintain their look and textures for longer.

The gentle way to care for wool

The Woolmark Blue certification in both washing and drying will treat each item in the gentlest possible manner, meaning you can safely wash and dry all of your hand wash woollen garments.
