

# Tectonic by Rogerseller

## Wall Shower

# Specification

## Please read before beginning installation:

The manufacturers warranty will not be covered if the product is installed in a room with systems or structures which do not meet the required building and plumbing standards or for work carried out by unqualified persons.

The product must be installed by qualified technicians only, in-line with local standards.

The installer must not alter any part of the product and should only connect and install the components as indicated in this manual.

This manual constitutes an integral part of the product. Please store it safely in an accessible place for future reference.

## Dimensions

## Product Breakdown

# Installation

## NOTE

Prior to installation of product please make sure allowances have been made for:

- Water connection 1x mixed water point.
- Stud frame in wall cavity to adequately support shower.

## STEP 1

Accurately measure Expansion Fixing Bolt locations and Water Inlet Connection point.

## STEP 2

A.  
Neatly trim Water Inlet Connection to a minimum of 12mm.

B.  
Drill out holes for Expansion Fixing Bolts approx. 60mm deep.  
Insert Expansion Fixing Bolts and secure.  
Please note that the bolts should not be loose after install.

# Installation

## STEP 3

To mount shower place the Wall Mount Bracket over the Expansion Fixing Bolts, then using the hex nuts and washers tighten until secure, making sure the product is locked safely in place.

## STEP 4

Connect the Water Inlet Hose to the threaded Water Inlet Connection from wall. Firmly tighten and test for leaks.

## STEP 5

Once install is complete and thoroughly checked that the product is secure, wipe over product with warm soapy water and a clean soft cloth.

Always remember to recycle.

## Specifications

It is a requirement that licensed technicians carry out all installations required of this product. All installations should comply with the relevant requirements, local codes and building and plumbing standards. Shower may not be suitable for use with gravity-fed water heaters, low and unequal pressure supply networks, instantaneous water heaters tempering valves and thermostatic mixing valves.

Care should be taken when installing the shower such that the flow controller is not damaged during installation.

### Water Pressure:

[1] Maximum Hydrostatic Pressure: 1000kpa. This pressure may be exceeded only under test conditions as per AS/NZS 3500. Where hydrostatic pressure exceeds the maximum stated above, pressure-limiting valves should be installed. [2] Recommended Maximum Hydrostatic Pressure: 500kpa (AS/NZS 3500)

[3] Recommended Minimum Hydrostatic Pressure: 150kpa

### Temperature:

Maximum Water Temperature: 80° C. For optimum performance, hot and cold inlet water pressure should be equal.

## Care and Maintenance

[1] Product should be inspected for surface damage prior to installation. [2] Cleaning and handling of all finishes must be performed carefully. [3] Clean products using a soft cloth with warm soapy water only. [4] Never use harsh detergents or abrasive cleaners as these will damage the product. [5] Water marks can be removed from Matt Finishes with an application of a carnauba wax based non-abrasive polish on a microfibre cloth. [6] Do not use undue pressure when cleaning and wipe in one direction only. [7] Contact with harsh chemicals such as hair dye, hair bleach etc will result in damage to the finish. [8] Tapware should never be installed using acetone silicones. [9] Avoid the use of wax based furniture creams as this can result in a build up of deposits which will detract from the appearance. [10] Damage to finishes arising from improper installation or post installation use or failure to observe the above care and cleaning instructions will void all warranty agreements.

## Warranty

Rogerseller tapware, bathroom fittings and sanitaryware are covered by a five (5) year warranty from date of purchase. For full terms and conditions please refer to [rogerseller.com.au](http://rogerseller.com.au)
